

Sample Chamber SOP - Document and Hearing Review

SYNTHETIC AUDIT INPUT - Example workflow, not a court order or case evidence.

1. Identify the client, represented side, proceeding, hearing purpose and requested relief before reviewing the file.
2. Tie each material factual assertion to an identifiable document and page. Label lawyer-provided updates separately from documentary evidence.
3. Separate admissions, disputed allegations and facts requiring confirmation. Never treat a missing document as proof that an allegation is false.
4. Compare material dates and amounts across the documents. State the exact conflicting passages and ask for clarification before choosing a value.
5. Check the latest hearing outcome and directions already recorded in the matter. Ask only for missing details or changes since that record.
6. For a property sale dispute, check the agreement, payments, completion deadline, claimed extensions, current funding evidence and requested protection against transfer.
7. For a cheque dishonour matter, check the debt record, cheque, return memo, notice and delivery evidence, defence, judgment and supported payment adjustments.
8. For an unpaid supply dispute, reconcile invoices, delivery acceptance, part-payments, quality objections, credits and the contractual interest calculation.
9. Identify expired or old evidence and ask for its current status. Do not assume a past loan sanction or statement remains current.
10. For every unresolved check, explain what information or document is missing. Distinguish a confirmed issue from a check that could not be completed.
11. Use specific document references in the hearing brief and compliance findings. Keep the lawyer's stated objective as the primary request.
12. Present proposed wording and legal conclusions for lawyer review. Do not invent facts, outcomes, filings, authorities or admissions.
